

Mohamed Elhalabi

Network, Infrastructure & Cybersecurity Graduate

SUMMARY

Newly graduated engineer from Jönköping University with a BSc in Network, Infrastructure and Cybersecurity. Tech-focused and service-oriented, with hands-on experience troubleshooting technical problems and supporting users directly at a high tempo — structured, and comfortable juggling several tickets at once without losing quality. Based in Jönköping, fluent in Swedish, English and Arabic, and motivated to keep growing in IT, infrastructure and cybersecurity. I learn by building, so I ship and document real projects.

EXPERIENCE

Retail Associate — Checkout & Online Orders · Stora Coop Aug 2025 – Present

- Help customers daily with a service-minded, professional approach
- Pick online customer orders with a focus on accuracy, structure and on-time delivery
- Comfortable with high-tempo customer contact and resolving questions on the spot

IT Technician / Technical Support · O-Ringen Jul 2025 – Aug 2025

- Installed, troubleshot and maintained IT equipment to keep networks, computers and systems stable throughout one of Sweden's largest sporting events
- Worked at high tempo on many parallel tickets, prioritising solutions around each user's needs
- Gave direct, on-site support to staff under real time pressure

EDUCATION

BSc — Network, Infrastructure & Cybersecurity · Jönköping University Sep 2023 – Jun 2026

- Network technology, systems administration, cybersecurity and troubleshooting of complex IT environments
- Hands-on labs with Cisco Packet Tracer, virtualization, and Linux/Windows administration
- Built and documented several projects applying these skills

Teknikprogrammet (Technology Programme) · Tranemo Gymnasieskola Aug 2020 – Jun 2023

SELECTED PROJECTS

Svenljunga Bilcenter — Dealership Website. A conversion-focused marketing website for a Swedish car dealership — a real freelance project, now live.

Sentinel Helpdesk AI. A secure, AI-assisted support-ticket platform for small businesses: capture every message, summarise it, and draft a reply the owner approves.

Sentinel WebGuard. A passive website trust, security-header, email-DNS and GDPR-readiness checkup turning public signals into a 0–100 score with plain-language fixes.

Sentinel PortfolioOS. A public case-study site plus a private admin CMS, built to run with zero config and upgrade to a live database.
